ENVIRONMENTAL IMPACT STATEMENT

Taking the assessment of potential impacts into account, herewith please receive an environmental impact statement that summarises the impact that the proposed activity may have on the environment after the management and mitigation of impacts have been taken into account, with specific reference to types of impact, duration of impacts, likelihood of potential impacts actually occurring and the significance of impacts.

+

ENVIRONMENTAL IMPACT STATEMENT

SITE ALTERNATIVE 1

TYPE OF IMPACT	DURATION	LIKELIHOOD	SIGNIFICANCE
 Site establishment & infrastructure development Alteration of the agricultural sense of place; Loss of agricultural land for duration of mining; Visual intrusion as a result of site establishment; Potential impact on fauna within the footprint area; Potential impact on vegetation and listed and/or protected plant species Dust nuisance due to site establishment Potential impact on archaeological artefacts; Work opportunities to 6 local residents (Positive Impact) 	Duration of site establishment phase (<1 month)	Possible Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility Definite	Low-Medium Concern Medium Concern Low-Medium Concern Low Concern Low Concern Low Concern Medium-High (+)
 Mining of aggregate: Soil contamination from hydrocarbon spills. Disturbance to fauna within the footprint area. Noise nuisance as a result of the mining activities. Potential impact on areas/infrastructure of heritage or cultural concern. 	Duration of operational phase (5 years maximum)	Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility	Low Concern Low-Medium Concern Low Concern Low Concern Low Concern
Stripping and stockpiling of topsoil and/or overburden: Visual intrusion caused by mining activities;	Duration of site establishment phase (<1 month)	Low Possibility	Low Medium Concern

ENVIRONMENTAL IMPACT STATEMENT

	SITE ALTERNATIVE 1		
Loss of stockpiled topsoil during mining and stockpiling;		Low Possibility	Low Medium Concern
Dust nuisance as a result of the disturbance of soil;		Low Possibility	Low Concern
Noise nuisance generated by earthmoving machinery;		Low Possibility	Low Concern
Infestation of the topsoil heaps and mining area with weeds or invader plant species;		Low Possibility	Low Concern
Potential impact on local fauna due to disturbance and loss of available habitat;		Low Possibility	Low Concern
Potential erosion of denuded areas;		Low Possibility	Low Concern
Loss of stockpiled material due to ineffective storm water control		Low Possibility	Low Medium Concern
Potential contamination of footprint area and surface runoff as a result of hydrocarbon spillages;		Possible	Low Concern
Orilling and blasting			
 Health and safety risk posed by blasting activities; 	Duration of operational phase	Low Possibility	Low Medium Concern
Dust nuisance caused by blasting activities;	(5 years maximum)	Low Possibility	Low Medium Concern
Noise nuisance as a result of blasting;		Low Possibility	Low Medium Concern
Excavation, loading and hauling to the processing			
<u>plant:</u>	Duration of operational		
Visual intrusion as a result of excavation and from loading and vehicles transporting the material	phase (5 years maximum)	Low Possibility	Low Medium Concern
Dust nuisance due to excavation and from loading and vehicles transporting the material;		Low Possibility	Low Concern
Noise nuisance as a result of the mining activities;		Low Possibility	Low Concern
Unsafe working environment for employees;		Low Possibility	Low Medium Concerr
Soil contamination from hydrocarbon spills and/or littering;		Low Possibility	Low Medium Concern
Potential impact on areas of palaeontological concern;		Low Possibility	Low Concern
Facilitation of erosion due to mining activities;		Low Possibility	Low Concern

ENVIRONMENTAL IMPACT STATEMENT

SITE ALTERNATIVE 1				
•				
Processing, stockpiling and transporting of material Dust nuisance generated at the processing plant; Noise nuisance stemming from operation of the processing plant; Visual intrusion as a result of operation of the processing plant Potential contamination of environment due to improper waste management; Overloading of trucks impacting road infrastructure; Degradation of the access road;	Duration of operational phase (5 years maximum)	Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility	Low Concern Low Medium Concern Low Concern Low Medium Concern Low Medium Concern	
Cumulative impacts: Impact the broad-scale ecological processes; Transformation of intact habitat would contribute to the fragmentation of the landscape and would potentially disrupt the connectivity of the landscape for fauna, avifauna, and flora and impair their ability to respond to environmental fluctuations.	Duration of all phases	LIKELIHOOD High Possibility High Possibility	SIGNIFICANCE Medium Concern Medium Concern	
 Sloping and landscaping upon closure of the mining area: Safety risk posed by un-sloped areas; Erosion of returned topsoil after rehabilitation; Infestation of the reinstated areas by weeds and invader plant species; Potential impact associated with litter/waste left at the mining area. Return of the mining area to landscape feature upon closure (Positive Impact). 	Duration of decommissioning phase (±2 months)	LIKELIHOOD Low Possibility Low Possibility Low Possibility Low Possibility Low Possibility Definite	SIGNIFICANCE Low Medium Concern Low Medium Concern Low Medium Concern Low Medium Concern Low Medium Concern Medium-High (+)
