**NOTICE OF MINING PERMIT APPLICATION AS WELL AS ENVIRONMENTAL AUTHORISATION APPLICATION**

Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Inzalo Crushing and Aggregates (Pty) Ltd applied for:

- environmental authorization to mine aggregate from a portion of Portion 1 of Fam Ruigtevley 97 KQ, Thabazimbi Local Municipality, Limpopo Province
- environmental authorization in terms of regulation 16(1) of the EIA Regulations to stockpile material on the above-mentioned property,
- a mining permit in terms of Section 27 of the MPRDA;

The proposed mining footprint will be 4.9 ha and will be developed over an undisturbed area of the farm. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. The aggregate will be stockpiled until it is transported from site using tipper trucks. All mining related activities will be contained within the approved mining permit boundaries.

In addition to the mining permit application, the applicant proposes to establish a 11.7 ha area for stockpiling and crushing of the material mined from the quarry on the same property. The material will be transported from the quarry into the stockpile area where it will be screened/crushed and stockpiled until removed from site.

The proposed two projects trigger the following listed activities in terms of NEMA, and the EIA Regulations 2014 (as amended):

- GNR 983 Listing Notice 1 Activity 21 as amended:**  
Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.
- GNR 983 Listing Notice 1 Activity 27 as amended:**  
The clearance of an area of 1 hectare or more, but less than 20 hectares of indigenous vegetation.
- GNR 985 Listing Notice 1 Activity 28 as amended:**  
Residential, mixed, retail, commercial, industrial or institutional developments where such land was used for agriculture, game farming, equestrian purposes or afforestation on or after 01 April 1998 and where such development:  
ii) will occur outside an urban area, where the total land to be developed is bigger than 1 hectare.  
Excluding where such land has already been developed for residential, mixed, retail, commercial, industrial or institutional purposes.
- GNR 985 Listing Notice 3 Activity 12 as amended:**  
The clearance of an area of 300 square metres or more of indigenous vegetation.
- e. Limpopo**  
i. Within any critically endangered or endangered ecosystem listed in terms of section 52 of the NEMBA or prior to the publication of such a list, within an area that has been identified as critically endangered in the National Spatial Biodiversity Assessment 2004,  
ii. Within critical biodiversity areas identified in bioregional plans;

The Draft Basic Assessment Reports (DBAR) with Environmental Management Programmes (EMPR) will be made available for comments as follows:

- Mining Permit Application**, from 14 October 2024 to 21 November 2024; and
- Stockpile (EA) Application**, from 28 October 2024 to 28 November 2024;

Copies thereof can be obtained from Greenmined upon request or downloaded from [www.greenmined.com](http://www.greenmined.com). Interested and Affected Parties are invited to provide written comments. Should additional information be required it can be obtained from Greenmined. Please use **LP 305/11/22/12396 MP** as a reference when commenting.

**Doppies vir 'n Rolstoel: Thabazimbi Gemeenskap staan saam vir Johandré**

**Thabazimbi** – Op Saterdag 5 Oktober 2024 het die gemeenskap van Thabazimbi met liefde en omgee deelgeneem aan 'n spesiale inisiatief om die "Sweet Hearts Foundation" te ondersteun. 'n Houer is geplaas by die Gereformeerde Kerk Thabazimbi waar mense hulle koeldrankdoppies, broodsakke-seëls en koffiehouer-deksels kon inbring. Hierdie bydraes help om rystoele te voorsien aan mense wat dit dringend nodig het, soos klein Johandré Goosen.

Johandré, wat aan West-sindroom ly, het 'n broodnodige rystoel ontvang danksy die gemeenskap se ywerige ondersteuning en bydraes. Woensdag 16 Oktober 2024, was 'n baie spesiale dag toe Johandré sy rystoel gekry het. Sy ma, Gerda Goosen, kon haar dankbaarheid nie in woorde uitdruk nie: "Dit beteken die wêreld vir ons. Dankie aan almal wat so hard gewerk het

om hierdie moontlik te maak – dit het regtig gebeur!" Johandré, wat op 26 Oktober sy derde verjaarsdag vier, sal nou meer mobiliteit hê en sy gesin kan nie wag om hom in sy splinternuwe rystoel te sien glimlag nie. Vir meer besonderhede, besoek die Sweet Hearts Foundation se webwerf by [www.sweetheartsfoundation.org](http://www.sweetheartsfoundation.org) of hulle Facebook-blad by [www.facebook.com/thesweetheartsfoundation](http://www.facebook.com/thesweetheartsfoundation).

Johandré Goosen, wat aan West-sindroom ly, het sy broodnodige rystoel ontvang – 'n groot stap vorentoe vir sy mobiliteit.

**Placing an obituary**

Announcing the death of a family member is a time-honoured tradition as life should be celebrated and never forgotten. To help you to celebrate the life of your loved one and share details about the upcoming funeral, place an obituary in our newspaper, free of charge. You can include the date of death, details about their life and surviving family members. You can also write a special message, a poem or a prayer. Please include a photo and the date, time and place of the memorial service.

**Elsie Flemming hou die wiele aan die rol**

**Northam/ Swartklip** – In die vroeë oggende en weer laatmiddag, is Elsie Flemming agter die stuur van haar Tata 21-seater bus, op pad om 21 kinders na skool te neem en terug. Vir die afgelope ses jaar het sy hierdie diens gelewer aan kinders van platte buite Northam wat na skole in Swartklip moet reis. Van kleuterskoolleerders tot hoërskoolleerlinge vertrou op Elsie se toewyding.

Wat haar werk besonders maak, is die liefde wat die kinders het vir die busrit. "Die lekkerste deel is as die kinders bly is om op die bus te ry, hulle geniet dit baie en sê die snaaksste goed," deel Elsie met 'n glimlag. Maar die pad is nie altyd sonder slaggate nie. Sy verduidelik dat die moeiliker kant van haar werk is wanneer die bus stukkend is of wanneer sy die ouers moet herinner aan die betaling van busgeld. "Sommige ouers betaal dadelik as hul salansse inkom," sê sy. Elsie onderhou die bus self, aangesien sy nie die luukse het om dit by 'n werkswinkel te laat herstel nie. Sy is trots daarop dat sy onlangs self 'n nuwe battery, grootte N674C, ingestit het en die starter vir R5 670 vervang het – met hulp van haar kinders wat haar geldelik bygestaan het. "Ek is hulle ewig dankbaar vir hulle hulp," sê sy. Met haar man wat 'n klein pensioen ontvang, dra Elsie op haar manier by tot die gesin se inkomste, al moet sy van haar verdienste gebruik om ook in die huis te help. Kontak Elsie by 073 760 030 1 vir meer informasie.

Elsie Flemming se Tata-bus, wat daaglik 21 kinders van Northam na Swartklip vervoer, het onlangs 'n nuwe N674C-battery en 'n anjaer (starter) gekry.

**TAR really needs your help**

**Thabazimbi** – There is a special plea to the community of Thabazimbi to support Thabazimbi Animal Rescue (TAR), your local animal shelter.

TAR needs donations of food. The facility is filled with animals that need your help. Please assist TAR to feed the animals in their care. Without donations they will not be able to feed, home and medically treat the animals. The community has proven time and again how they can stand together and support this worthy cause and this time is no exception.

**For more information, please contact TAR on 084 885 6487.**

**LAND USE APPLICATION ADVERTISEMENT**  
NOTICE IN TERMS OF SECTION 57(1) OF THE MOSES KOTANE SPATIAL PLANNING AND LAND USE MANAGEMENT BY-LAW, 2017 FOR A CHANGE OF LAND USE RIGHTS KNOWN AS A REZONINGROM. MOSES KOTANE LOCAL MUNICIPALITY AMENDMENT SCHEME

I, Japhter Khuliso Mukhovha of the firm Rams Group (Pty) Ltd, being the authorised agent of the owner of the portion of the remaining extent of the Farm Hoffontein 361 KQ, Disake Village, North West Province hereby give notice in terms of Section 51(1) of the Moses Kotane Spatial Planning and Land Use Management By-Law, 2017 that I have applied to the Moses Kotane Local Municipality for a change of land use rights also known as rezoning of portion of the remaining extent of the Farm Hoffontein 361 KQ, Disake Village from agricultural zone I to business zone II for the purpose of development of a filling station and associated infrastructure. Any objections and/or comments, with grounds therefore and contact details shall be lodged within a period of 28 days from the first date on which the notice appeared, with or made to the responsible Town Planner, Mr K Mrope in writing via e-mail at [kmrope@moseskotane.gov.za](mailto:kmrope@moseskotane.gov.za) or at Moses Kotane Local Municipality Old Building at No. 933, Station Road, Mogwase 0314 or telephonically on 014 555 1529. Full particulars and plans (if any) may be inspected during normal hours at the above-mentioned offices, for a period of 28 days from the date of the first publication of the advertisement in the Bushvelder Newspaper and/or Site Notice. **Closing dates for any objections:** Friday, 15 November 2024. **Details of applicant:** Khuliso Mukhovha, email: [kjmkhovha@gmail.com](mailto:kjmkhovha@gmail.com) cell: 073 219 9357. **Nature of Application:** Rezoning of the subject property from Agriculture Zone I to Business Zone II. **Reference Number:** REM-Hoffontein 361KQ

**ALL INTERESTED AND AFFECTED PARTIES TO NOTE:** Should you submit a comment or objection on this land use application, you give permission in terms of the Protection of Personal Information Act (POPIA) to the Municipality to make your information available to the public during this land use application process. If you do not want your private information made public, you need to indicate it in writing with your comments/objection.

## Interim Comment

### In terms of Section 38(3) of the National Heritage Resources Act (Act 25 of 1999)

Chris Weideman  
Inzalo Crushing and Aggregates (Pty) Ltd  
PO Box 26730  
East Rand  
Kempton Park  
1462

Inzalo Crushing and Aggregates Pty) Ltd (hereafter referred to as the applicant) appointed Greenmined Environmental (Pty) Ltd as the environmental impact assessment practitioner (EAP) to undertake the EIA associated with the mining permit application on a portion of Portion 1 of Farm Ruigtevley 97 KQ, Thabazimbi Local Municipality, Limpopo Province.

A Draft Basic Assessment Report (DBAR) and Environmental Management Programme Report (EMPR) has been submitted in terms of the National Environmental Management Act, 1998 (NEMA) and the EIA Regulations for activities that trigger the Mineral and Petroleum Resources Development Act, 2002 (MPRDA)(As amended). The proposed mining area is approximately 4.9 ha in extent and the applicant, Inzalo Crushing and Aggregates (Pty) Ltd, intends to win material from the area for at least 2 years with a possible extension of another 3 years. The mining method will make use of blasting in order to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles.

### Interim Comment

SAHRA requests that an assessment of the impacts to heritage resources that complies with section 38(3) of the NHRA as required by section 38(8) of the NHRA and section 24(4)b(iii) of NEMA be conducted as part of the EA process.

The assessment must include an assessment of the impact to archaeological resources. The field-based assessment of archaeological resources must be conducted by a qualified archaeologist and the report comply with the SAHRA 2007 Minimum Standards: Archaeological and Palaeontological Components of Impact Assessment Reports (see [www.asapa.co.za](http://www.asapa.co.za) or [www.aphp.org.za](http://www.aphp.org.za) for a list of qualified archaeologists). The assessment must include the track logs of the area to be surveyed.

Enquiries: Nokusho Ngobeni  
Tel:  
Email: [nngobeni@sahra.org.za](mailto:nngobeni@sahra.org.za)  
Case ID: 23767

Date: Tuesday, 19 November, 2024

Any other heritage resources as defined in section 3 of the NHRA that may be impacted, such as built structures over 60 years old, sites of cultural significance associated with oral histories, burial grounds and graves, graves of victims of conflict, and cultural landscapes or viewsapes must also be assessed.

The applicant is advised to extend the EA process in terms of section 19(1)b of the NEMA EIA regulations in order to address this comment. Further comments will be issued upon receipt of the above requested reports.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

**Subject:** DBAR Notice LP 30/5/1/3/2/12396 MP Stakeholders  
**Attachments:** DBAR Notice - Ruigtevley MP.pdf

To whom it may concern:

RE: NOTICE OF THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION IN TERMS OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) (MPRDA), THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) (EIA REGULATIONS) SUBMITTED BY INZALO CRUSHING AND AGGREGATES (PTY) LTD, REFERENCE NUMBER: LP 30/5/1/3/2/12396 MP.

The draft Basic Assessment Report (DBAR) with Environmental Management Programme (EMPR), for the proposed mining of aggregate/gravel on a portion of Portion 1 of Farm Ruigtevley 97 KQ, Thabazimbi Local Municipality, Limpopo Province, is now available for your perusal.

A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or downloaded from the company website at <https://www.greenmined.com/mining-permits/>.

Should you be interested your comments are kindly requested on the DBAR & EMPR. A forty-day commenting period, from 14 October 2024 to 21 November 2024, will be allowed for comments.

Your comments must be in writing and can be submitted via e-mail and/or post.

Please ensure that your contact details are included with your comments, use LP 30/5/1/3/2/12396 MP as a reference when commenting.

Please contact Zoë Norval at 072 759 9059(Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or [comments@greenmined.co.za](mailto:comments@greenmined.co.za) should you require any additional information.

Your feedback is valued and will be addressed appropriately.

Kind Regards/Vriendelike Groete

**Subject:** DBAR Notice LP 30/5/1/3/2/12396 MP Stakeholders  
**Attachments:** DBAR Notice - Ruigtevley MP.pdf

To whom it may concern:

RE: NOTICE OF THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION IN TERMS OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) (MPRDA), THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) (EIA REGULATIONS) SUBMITTED BY INZALO CRUSHING AND AGGREGATES (PTY) LTD, REFERENCE NUMBER: LP 30/5/1/3/2/12396 MP.

The draft Basic Assessment Report (DBAR) with Environmental Management Programme (EMPR), for the proposed mining of aggregate/gravel on a portion of Portion 1 of Farm Ruigtevley 97 KQ, Thabazimbi Local Municipality, Limpopo Province, is now available for your perusal.

A copy of the documents can be obtained from Greenmined Environmental (Pty) Ltd upon request or downloaded from the company website at <https://www.greenmined.com/mining-permits/>.

Should you be interested your comments are kindly requested on the DBAR & EMPR. A forty-day commenting period, from 14 October 2024 to 21 November 2024, will be allowed for comments.

Your comments must be in writing and can be submitted via e-mail and/or post.

Please ensure that your contact details are included with your comments, use LP 30/5/1/3/2/12396 MP as a reference when commenting.

Please contact Zoë Norval at 072 759 9059(Cell) or 021 851 2673 (Tel), 086 546 0579 (Fax), or [comments@greenmined.co.za](mailto:comments@greenmined.co.za) should you require any additional information.

Your feedback is valued and will be addressed appropriately.

Kind Regards/Vriendelike Groete

Good day Zoe and Anel

Please find attached hereto a letter for your attention.

Please take notice that these comments and objections are relevant to both the proposed aggregate mine as well as the proposed stockpile area, as such we would like for our comments to be included in the report for both projects.

Kind regards

*\*Please take note that our offices will be closed from 17 December 2024 and will reopen on 7 January 2025.

28 November 2024

**By Way of E-Mail:**     **Zoe Norval** [Zoe@greenmined.co.za](mailto:Zoe@greenmined.co.za)  
                                  **Anel Olivier** [comments@greenmined.co.za](mailto:comments@greenmined.co.za)

**RE: INZALO CRUSHING AND AGGREGATES (PTY) LTD.  
PORTION 1 OF FARM RUIGTEVLEY 97 KQ THABAZIMBI, LIMPOPO.  
PROPOSED AGGREGATE MINE (LP 30/5/1/3/2/12396 MP) AND  
STOCKPILE AREA.  
COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT AND  
ENVIRONMENTAL MANAGEMENT PROGRAMME.**

Dear Zoe and Anel

1. We refer to the abovementioned matter and confirm that we are acting on behalf of our clients Reinland CC and Maxgem Mining CC ("our clients") under whose instruction this letter is provided and whose rights remain reserved.
2. Our clients are the owners of portions 0, 1, 2, 3 and 4 of the farm Vaalpenspan 90KQ. The proposed project site is situated on portion 1 of the farm Ruigtevley 97 KQ, which is directly across our client's property, as such, our client will be directly impacted by this development.

3. Please take notice that these comments and objections are relevant to both the proposed aggregate mine as well as the proposed stockpile area, as such we would like for our comments to be included in the report for both projects.
4. Please take further notice that we did attempt to arrange a stakeholder meeting at the proposed project site, but we were unable to find a date that was suitable for all parties. We will continue to communicate until such a meeting can be arranged.
5. We have been instructed by our clients to convey the following concerns and comments in terms of the Draft Basic Assessment Report ("BAR") and Environmental Management Program Report ("EMPR") for the proposed projects.

### **SUMMARY OF MAIN CONCERNS**

6. Our client's property is currently being utilized as a hunting farm. The activities conducted on their farm include hunting for profit, breeding wildlife for resale, selling animal products, providing luxury accommodation and offering game drives. Our client's income is thus primarily derived from the tourism and hospitality market, which is significantly influenced by their customer's willingness to stay in an environment free from noise, pollution, dust and unsightly views. Therefore, maintaining a peaceful, clean and visually appealing setting is essential for our client's successful business.
7. Operating a hunting farm has created many local job opportunities. Our client currently employs over 20 people at the hunting farm. These employees' salaries and careers are closely tied to the success of the tourism and hospitality market mentioned above.
8. Our client has also raised concerns over the well-being of his wildlife, as the noise and dust associated with mining, crushing and screening could disturb his animal's natural behaviour. The noise may impact the animal's stress levels causing them to flee to the furthers corners of the farm and potentially jumping the fence, their mating and breeding patterns could also potentially be affected. Additionally, the dust and potential water pollution could lead to the animals ingesting contaminated

food and water. This would not only negatively impact the animal's general health, but it would also compromise the quality of the meat they produce, ultimately affecting the profitability and sustainability of the farm.

9. Our client questions the integrity of the road leading to his property. The increased traffic from heavy machinery will likely cause significant erosion over time, which would damage the road and create obstacles for customers. Additionally, the presence of unsightly machinery travelling along the road may detract from the overall experience for visitors. Unforeseen traffic delays could also disrupt customers' arrival times, further impacting their visit and our client's business.
10. This proposed mine will not only impact our client's current use, enjoyment and profitability, but it could also reduce the farm's value.

## **THE VISUAL IMPACT**

11. We have taken note of your statement that the proposed mining activity will be partially obscured by a hill. However, as our client and ourselves have not yet had the opportunity to inspect the proposed mining site, we cannot confirm that the visual effect will be minimal. Our client's property is situated directly across the proposed site, as such we believe that further assessment is necessary.
12. The DBAR for the proposed mining project indicates that the visual intrusions resulting from site establishment, mining activities, excavation, form loading, and vehicle transport of material will be of medium significance. This raises concerns, as even moderate visual intrusions could detract from the natural beauty of the area, which is a key selling point for our client's business
13. The DBAR for the stockpile area states that there will be a low to medium visual impact caused by the site establishment phase, stockpiling activities, and operation of the processing plant. While the EMPR advise on how these visual impacts will be mitigated.

14. Despite the claim that proper housekeeping and organisation will mitigate the visual impact, there would still be a visual impact visible when travelling to and around our client's property, possibly even from the camping site. As stated above our client's main source of income is related to the tourism and hospitality market which relies on the unobstructed natural beauty of the area.
15. The aesthetic changes resulting from this proposed project will directly affect our client's business. Visitors come to the farm not only for hunting but also to escape the visual and sensory overload of city life. Being confronted by a mining site after expecting to enjoy an undisturbed natural environment, would negatively impact the experience our client offers and, by extension, their business model.

### **NOISE LEVELS**

16. The DBAR for the proposed mining project indicates that the noise nuisance caused by earthmoving machinery is of medium significance, while the noise nuisance resulting from blasting and mining activities is classified as low to medium significance. However, even noise at a lower level can still affect the surrounding environment and our client's business operations
17. The DBAR for the stockpile area confirms that noise will be generated due to activities such as screening, crushing, and transporting materials. Noise from the crushing and screening processes during the stripping and stockpiling of topsoil and overburden is rated as a medium-level concern. Additionally, noise from the operation of the processing plant and crushing and screening machinery is categorized as low to medium-level concerns.
18. The noise generated from this proposed project will hinder not only our client's use and enjoyment of their property but also the customers who are trying to escape the noise from their busy city lives. The presence of ongoing noise pollution will undoubtedly detract from the peaceful, tranquil environment that our client's business relies on to attract guests.

19. Furthermore, there is concern that the noise and vibration caused by mining, blasting, and crushing activities could impact the natural behaviour of our client's wildlife. As noted earlier, the farm's animals are an essential part of our client's operations, and any disturbance to their behaviour could affect the overall experience for visitors and potentially harm the long-term viability of the farm's activities.

## **DUST**

20. Both DBARs confirm that dust will be generated as a result of activities such as blasting, displacement of soil, crushing and screening of hard rock, and the transport of material along gravel roads. Dust nuisance from site establishment, soil disturbance, and operation of the processing plant has been classified as a low to medium risk.
21. While dust suppression methods and housekeeping measures will be implemented to mitigate these issues, it is unclear how effective these methods will be in fully containing dust during periods of high wind.
22. Our clients are particularly concerned that airborne dust could be carried into their water supply and grazing grounds for wildlife, potentially leading to a decline in animal health. This could also negatively impact the quality of the meat produced, posing a threat to both environmental and economic sustainability.
23. Furthermore, maintaining cleanliness in an overnight accommodation business located nearby would be challenging if dust from the project site continues to blow onto the property. The accumulation of dust would compromise the quality of service and create significant operational difficulties in managing the cleanliness and hygiene of the accommodations

## **THE ROAD**

24. The DBAR for both the mining project and stockpile area indicates that the existing farm road will be used for site access. The EMPR outlines that the Applicant will

repair any damage caused to the access road as a direct result of the proposed activities and will implement measures to maintain the integrity of the road to the best of the Applicant's ability.

25. However, the increased traffic associated with the proposed project will likely accelerate the erosion of the road, leading to more frequent maintenance requirements. This continuous need for road repairs will create obstacles and potential traffic disruptions, ultimately affecting the experience and accessibility for customers visiting the property.

## **CONCLUSION**

26. In light of the concerns outlined above, it is clear that the proposed mining and stockpiling project will have detrimental effects on our client's business operations and the environment. The potential impacts on the aesthetic value of the property, noise pollution, dust nuisance, and the condition of the access road could significantly diminish the appeal of our client's hunting farm thus directly affecting our client's profitability and sustainability. Furthermore, the health and welfare of the farm's wildlife, which are integral to the client's business model, could be compromised by the adverse effects of mining activities.
27. Given the numerous risks posed by this proposed project, our client is compelled to formally object to the granting of the mining permit. The potential for long-term damage to the property's natural beauty cannot be overlooked.
28. Section 10(2) of the Mineral and Petroleum Resources Development Act 28 of 2002 ("MPRDA") states that:  
*"If a person objects to the granting of a prospecting right, mining right, or mining permit, the Regional Manager must refer the objection to the Regional Mining Development and Environmental Committee to consider the objections and to advise the minister thereof."*

29. The consequences of granting the mining permit are too significant to be disregarded, and we trust that this objection will be carefully evaluated during the decision-making process.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Johan Smuts', written in a cursive style.

Good morning Caitlin,

Thank you for your email and taking part in the public participation process.

All comments received will be incorporated in the Final Basic Assessment Report for submission, on both the mine permit application and stockpile application.

Trust you find this in order.

Kind Regards/Vriendelike Groete

**RE: OBJECTION IN TERMS OF SECTION 10 OF THE MPRDA  
INZALO CRUSHING AND AGGREGATES (PTY) LTD.  
PORTION 1 OF FARM RUIGTEVLEY 97 KQ THABAZIMBI, LIMPOPO.  
PROPOSED AGGREGATE MINE (LP 30/5/1/3/2/12396 MP) AND  
STOCKPILE AREA.  
COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT AND  
ENVIRONMENTAL MANAGEMENT PROGRAMME.**

Dear Mr Mulaudzi

1. We refer to the abovementioned matter and confirm that we are acting on behalf of our clients Reinland CC and Maxgem Mining CC ("our clients") under whose instruction this letter is provided and whose rights remain reserved.
2. Our clients are the owners of portions 0, 1, 2, 3 and 4 of the farm Vaalpenspan 90KQ. The proposed project site is situated on portion 1 of the farm Ruigtevley 97 KQ, which is directly across our client's property, as such, our client will be directly impacted by this development.
3. Please take notice that these comments and objections are relevant to both the proposed aggregate mine as well as the proposed stockpile area, as such we would like for our comments to be included in the report for both projects.
4. Please take further notice that we did attempt to arrange a stakeholder meeting at the proposed project site, but we were unable to find a date that was suitable for all parties. We will continue to communicate until such a meeting can be arranged.
5. We have been instructed by our clients to convey the following concerns and comments in terms of the Draft Basic Assessment Report ("BAR") and Environmental Management Program Report ("EMPR") for the proposed projects.

### **SUMMARY OF MAIN CONCERNS**

6. Our client's property is currently being utilized as a hunting farm. The activities conducted on their farm include hunting for profit, breeding wildlife for resale, selling animal products, providing luxury accommodation and offering game drives. Our client's income is thus primarily derived from the tourism and hospitality market, which is significantly influenced by their customer's willingness to stay in an environment free from noise, pollution, dust and unsightly views. Therefore, maintaining a peaceful, clean and visually appealing setting is essential for our client's successful business.
7. Operating a hunting farm has created many local job opportunities. Our client currently employs over 20 people at the hunting farm. These employees' salaries

and careers are closely tied to the success of the tourism and hospitality market mentioned above.

8. Our client has also raised concerns over the well-being of his wildlife, as the noise and dust associated with mining, crushing and screening could disturb his animal's natural behaviour. The noise may impact the animal's stress levels causing them to flee to the furthers corners of the farm and potentially jumping the fence, their mating and breeding patterns could also potentially be affected. Additionally, the dust and potential water pollution could lead to the animals ingesting contaminated food and water. This would not only negatively impact the animal's general health, but it would also compromise the quality of the meat they produce, ultimately affecting the profitability and sustainability of the farm.
9. Our client questions the integrity of the road leading to his property. The increased traffic from heavy machinery will likely cause significant erosion over time, which would damage the road and create obstacles for customers. Additionally, the presence of unsightly machinery travelling along the road may detract from the overall experience for visitors. Unforeseen traffic delays could also disrupt customers' arrival times, further impacting their visit and our client's business.
10. This proposed mine will not only impact our client's current use, enjoyment and profitability, but it could also reduce the farm's value.

## **THE VISUAL IMPACT**

11. We have taken note of your statement that the proposed mining activity will be partially obscured by a hill. However, as our client and ourselves have not yet had the opportunity to inspect the proposed mining site, we cannot confirm that the visual effect will be minimal. Our client's property is situated directly across the proposed site, as such we believe that further assessment is necessary.
12. The DBAR for the proposed mining project indicates that the visual intrusions resulting from site establishment, mining activities, excavation, form loading, and vehicle transport of material will be of medium significance. This raises concerns,

as even moderate visual intrusions could detract from the natural beauty of the area, which is a key selling point for our client's business

13. The DBAR for the stockpile area states that there will be a low to medium visual impact caused by the site establishment phase, stockpiling activities, and operation of the processing plant. While the EMPR advise on how these visual impacts will be mitigated.
14. Despite the claim that proper housekeeping and organisation will mitigate the visual impact, there would still be a visual impact visible when travelling to and around our client's property, possibly even from the camping site. As stated above our client's main source of income is related to the tourism and hospitality market which relies on the unobstructed natural beauty of the area.
15. The aesthetic changes resulting from this proposed project will directly affect our client's business. Visitors come to the farm not only for hunting but also to escape the visual and sensory overload of city life. Being confronted by a mining site after expecting to enjoy an undisturbed natural environment, would negatively impact the experience our client offers and, by extension, their business model.

## **NOISE LEVELS**

16. The DBAR for the proposed mining project indicates that the noise nuisance caused by earthmoving machinery is of medium significance, while the noise nuisance resulting from blasting and mining activities is classified as low to medium significance. However, even noise at a lower level can still affect the surrounding environment and our client's business operations
17. The DBAR for the stockpile area confirms that noise will be generated due to activities such as screening, crushing, and transporting materials. Noise from the crushing and screening processes during the stripping and stockpiling of topsoil and overburden is rated as a medium-level concern. Additionally, noise from the operation of the processing plant and crushing and screening machinery is

categorized as low to medium-level concerns.

18. The noise generated from this proposed project will hinder not only our client's use and enjoyment of their property but also the customers who are trying to escape the noise from their busy city lives. The presence of ongoing noise pollution will undoubtedly detract from the peaceful, tranquil environment that our client's business relies on to attract guests.
19. Furthermore, there is concern that the noise and vibration caused by mining, blasting, and crushing activities could impact the natural behaviour of our client's wildlife. As noted earlier, the farm's animals are an essential part of our client's operations, and any disturbance to their behaviour could affect the overall experience for visitors and potentially harm the long-term viability of the farm's activities.

## **DUST**

20. Both DBARs confirm that dust will be generated as a result of activities such as blasting, displacement of soil, crushing and screening of hard rock, and the transport of material along gravel roads. Dust nuisance from site establishment, soil disturbance, and operation of the processing plant has been classified as a low to medium risk.
21. While dust suppression methods and housekeeping measures will be implemented to mitigate these issues, it is unclear how effective these methods will be in fully containing dust during periods of high wind.
22. Our clients are particularly concerned that airborne dust could be carried into their water supply and grazing grounds for wildlife, potentially leading to a decline in animal health. This could also negatively impact the quality of the meat produced, posing a threat to both environmental and economic sustainability.
23. Furthermore, maintaining cleanliness in an overnight accommodation business located nearby would be challenging if dust from the project site continues to blow

onto the property. The accumulation of dust would compromise the quality of service and create significant operational difficulties in managing the cleanliness and hygiene of the accommodations

## **THE ROAD**

24. The DBAR for both the mining project and stockpile area indicates that the existing farm road will be used for site access. The EMPR outlines that the Applicant will repair any damage caused to the access road as a direct result of the proposed activities and will implement measures to maintain the integrity of the road to the best of the Applicant's ability.
25. However, the increased traffic associated with the proposed project will likely accelerate the erosion of the road, leading to more frequent maintenance requirements. This continuous need for road repairs will create obstacles and potential traffic disruptions, ultimately affecting the experience and accessibility for customers visiting the property.

## **CONCLUSION**

26. In light of the concerns outlined above, it is clear that the proposed mining and stockpiling project will have detrimental effects on our client's business operations and the environment. The potential impacts on the aesthetic value of the property, noise pollution, dust nuisance, and the condition of the access road could significantly diminish the appeal of our client's hunting farm thus directly affecting our client's profitability and sustainability. Furthermore, the health and welfare of the farm's wildlife, which are integral to the client's business model, could be compromised by the adverse effects of mining activities.
27. Given the numerous risks posed by this proposed project, our client is compelled to formally object to the granting of the mining permit. The potential for long-term damage to the property's natural beauty cannot be overlooked.

28. Section 10(2) of the Mineral and Petroleum Resources Development Act 28 of 2002 ("MPRDA") states that:

*"If a person objects to the granting of a prospecting right, mining right, or mining permit, the Regional Manager must refer the objection to the Regional Mining Development and Environmental Committee to consider the objections and to advise the minister thereof."*

29. The consequences of granting the mining permit are too significant to be disregarded, and we trust that this objection will be carefully evaluated during the decision-making process.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Johan Smuts', written in a cursive style.

Attention: Mr Johan Smuts

06 November 2024

Dear Sir

**RE: RESPONSE TO THE COMMENTS ON THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR BOTH THE MINING PERMIT APPLICATION AND STOCKPILE APPLICATION ON A PORTION OF PORTION 1 OF FARM RUIGTEVLEY 97 KQ, THABAZIMBI LOCAL MUNICIPALITY, LIMPOPO PROVINCE: INZALO CRUSHING AND AGGREGATES (PTY) LTD.**

We refer to your letter dated 28 November 2024 sent in response to the draft Basic Assessment Report (DBAR) and Environmental Management Programme (EMPr) circulated for public comment in respect of the mining permit application as well as the stockpile application on a portion of Portion 1 of Farm Ruigtevley 97 KQ, Thabazimbi Local Municipality, Limpopo Province. We would like to thank you for participating in this process and for your valued comments.

We note your representation of Reinland CC and Maxgem Mining CC and acknowledge their right to provide comments and objections.

All concerns outlined have been noted and will be addressed with reference to the DBAR's findings and proposed mitigation measures in the FBAR.

We confirm that your response will be included to the final BAR and/or EMPr for decision making, but wish to respond directly as follows:

- Our client's property is currently being utilized as a hunting farm. The activities conducted on their farm include hunting for profit, breeding wildlife for resale, selling animal products, providing luxury accommodation and offering game drives. Our client's income is thus primarily derived from the tourism and hospitality market, which is significantly influenced by their customer's willingness to stay in an environment free from noise, pollution, dust and unsightly views. Therefore, maintaining a peaceful, clean and visually appealing setting is essential for our client's successful business.

- The proximity of the project to your client's property is acknowledged, and the DBAR has assessed potential impacts on neighbouring properties, including visual, noise, and dust impacts. Mitigation measures detailed in the DBAR will specifically address these potential impacts
- Operating a hunting farm has created many local job opportunities. Our client currently employs over 20 people at the hunting farm. These employees' salaries and careers are closely tied to the success of the tourism and hospitality market mentioned above.
  - We acknowledge that your client's property is used as a hunting farm and that maintaining a clean, peaceful, and visually appealing environment is critical for their business.
  - This project is for the mining of aggregates to support local infrastructure development, which will benefit the community, including the tourism industry.
  - The project is small-scale and temporary, with no long-term effects expected.
  - The applicant recognizes the importance of your client's contribution to local employment. Infrastructure upgrades facilitated by the project, such as improved roads, will enhance access and benefit both the local community and the tourism sector.
- Our client has also raised concerns over the well-being of his wildlife, as the noise and dust associated with mining, crushing and screening could disturb his animal's natural behaviour. The noise may impact the animal's stress levels causing them to flee to the furthers corners of the farm and potentially jumping the fence, their mating and breeding patterns could also potentially be affected. Additionally, the dust and potential water pollution could lead to the animals ingesting contaminated food and water. This would not only negatively impact the animal's general health, but it would also compromise the quality of the meat they produce, ultimately affecting the profitability and sustainability of the farm.
  - We acknowledge that your client's concerns over the well-being of his wildlife,
  - Mitigation measures will address potential impacts on wildlife, including:
    - Dust suppression (water spraying).
    - Noise management (regulated operational hours).
    - Regular environmental monitoring to ensure water and soil quality is maintained.
    - These measures will reduce stress on wildlife and preserve their natural behaviours, ensuring minimal disruption to your client's operations.

- Our client questions the integrity of the road leading to his property. The increased traffic from heavy machinery will likely cause significant erosion over time, which would damage the road and create obstacles for customers. Additionally, the presence of unsightly machinery travelling along the road may detract from the overall experience for visitors. Unforeseen traffic delays could also disrupt customers' arrival times, further impacting their visit and our client's business.
  - We acknowledge concerns about increased traffic and road wear. The applicant is committed to:
    - Implement measures to minimize disruption.
    - Repairing and maintaining roads affected by project-related activities to ensure continued accessibility for all users.
    - The visual impact of machinery will be mitigated through proper scheduling and limiting transport during peak tourist hours.
- This proposed mine will not only impact our client's current use, enjoyment and profitability, but it could also reduce the farm's value.
  - The project will be temporary and carried out with full consideration of the current land uses.
  - Aggregates are essential for upgrading local infrastructure, including roads, which will benefit the community, tourism, and the overall economy.
  - While we note your concern regarding potential devaluation, these upgrades will enhance the area's appeal and accessibility in the long term.

## **THE VISUAL IMPACT**

- We have taken note of your statement that the proposed mining activity will be partially obscured by a hill. However, as our client and ourselves have not yet had the opportunity to inspect the proposed mining site, we cannot confirm that the visual effect will be minimal. Our client's property is situated directly across the proposed site, as such we believe that further assessment is necessary.
- The DBAR for the proposed mining project indicates that the visual intrusions resulting from site establishment, mining activities, excavation, form loading, and vehicle transport of material will be of medium significance. This raises concerns, as even moderate visual intrusions could detract from the natural beauty of the area, which is a key selling point for our client's business.

- The DBAR for the stockpile area states that there will be a low to medium visual impact caused by the site establishment phase, stockpiling activities, and operation of the processing plant. While the EMPR advise on how these visual impacts will be mitigated.
- Despite the claim that proper housekeeping and organisation will mitigate the visual impact, there would still be a visual impact visible when travelling to and around our client's property, possibly even from the camping site. As stated above our client's main source of income is related to the tourism and hospitality market which relies on the unobstructed natural beauty of the area.
- The aesthetic changes resulting from this proposed project will directly affect our client's business. Visitors come to the farm not only for hunting but also to escape the visual and sensory overload of city life. Being confronted by a mining site after expecting to enjoy an undisturbed natural environment, would negatively impact the experience our client offers and, by extension, their business model.

The DBAR acknowledges that visual intrusions resulting from site establishment, mining activities, excavation, form loading, and vehicle transport are of medium significance.

- The statement in the DBAR regarding the partial obscuring of the proposed mining activity by a hill is based on a detailed visual impact assessment conducted during the environmental study.
- Mitigation measures, have been designed to further reduce visual impacts from surrounding properties, including your client's.
- To address your concern, we acknowledge the importance of stakeholder validation and invite your client to participate in a site inspection to assess the proposed mitigation measures firsthand.
- Additionally, we will ensure that the final Basic Assessment Report includes comprehensive details of the visual impact assessment, reinforcing the effectiveness of the proposed mitigation measures.
- Further consultation is welcome to explore any specific additional assessments your client deems necessary to address this concern.

Mitigation measures to minimize these impacts include:

- Ensuring infrastructure and equipment adhere to low-profile designs with natural colour schemes to blend into the surrounding environment.

- Maintaining proper housekeeping to ensure a neat and organized appearance of the site at all times.
- Rehabilitation will be a priority upon completion of mining activities. This includes:
  - Implementing a detailed rehabilitation plan to reintroduce indigenous vegetation and contour the land to blend with the natural landscape.
  - Creating a final landform that is visually cohesive with the surrounding environment, ensuring the site maintains a neat and aesthetically pleasing appearance post-closure.
  - These efforts aim to mitigate visual impacts during operations and restore the area to a state that supports its natural beauty and overall appeal.

#### **NOISE LEVELS**

- The DBAR for the proposed mining project indicates that the noise nuisance caused by earthmoving machinery is of medium significance, while the noise nuisance resulting from blasting and mining activities is classified as low to medium significance. However, even noise at a lower level can still affect the surrounding environment and our client's business operations.
- The DBAR for the stockpile area confirms that noise will be generated due to activities such as screening, crushing, and transporting materials. Noise from the crushing and screening processes during the stripping and stockpiling of topsoil and overburden is rated as a medium-level concern. Additionally, noise from the operation of the processing plant and crushing and screening machinery is categorized as low to medium-level concerns.
- The noise generated from this proposed project will hinder not only our client's use and enjoyment of their property but also the customers who are trying to escape the noise from their busy city lives. The presence of ongoing noise pollution will undoubtedly detract from the peaceful, tranquil environment that our client's business relies on to attract guests.
- Furthermore, there is concern that the noise and vibration caused by mining, blasting, and crushing activities could impact the natural behaviour of our client's wildlife. As noted earlier, the farm's animals are an essential part of our client's operations, and any disturbance to their behaviour could affect the overall experience for visitors and potentially harm the long-term viability of the farm's activities.
  - We acknowledge the concerns regarding noise and vibration impacts on the surrounding environment, your client's business operations, and wildlife.

- The DBAR outlines specific mitigation measures to address these impacts, which will be strictly enforced throughout the project lifecycle, including:
  - Ensuring all machinery is fitted with silencers and is properly maintained to minimize noise emissions.
  - Scheduling noise-intensive activities, such as blasting, during specific times to reduce disruption.
  - Monitoring noise levels regularly to ensure compliance with national noise standards.

## **DUST**

- Both DBARs confirm that dust will be generated as a result of activities such as blasting, displacement of soil, crushing and screening of hard rock, and the transport of material along gravel roads. Dust nuisance from site establishment, soil disturbance, and operation of the processing plant has been classified as a low to medium risk.
- While dust suppression methods and housekeeping measures will be implemented to mitigate these issues, it is unclear how effective these methods will be in fully containing dust during periods of high wind.
- Our clients are particularly concerned that airborne dust could be carried into their water supply and grazing grounds for wildlife, potentially leading to a decline in animal health. This could also negatively impact the quality of the meat produced, posing a threat to both environmental and economic sustainability.
- Furthermore, maintaining cleanliness in an overnight accommodation business located nearby would be challenging if dust from the project site continues to blow onto the property. The accumulation of dust would compromise the quality of service and create significant operational difficulties in managing the cleanliness and hygiene of the accommodations.
  - We acknowledge that the DBARs confirm dust will be generated from activities such as blasting, soil displacement, crushing, screening, and material transport. The potential for dust nuisance is classified as a low to medium risk.
  - It is important to emphasize that this project is temporary in nature, and dust generation will be limited to the operational phases of the mining and stockpiling activities. Post-mining rehabilitation will further reduce any residual dust impacts.

- A Dust Management Plan (DMP) will ensure compliance with air quality standards and address concerns about dust affecting wildlife and client operations.
- Comprehensive dust management measures will be implemented and strictly enforced, including:
  - Dust suppression methods such as regular water spraying on roads, stockpiles, and operational areas.
  - The use of chemical dust suppressants where necessary to enhance control.
  - Limiting the height of stockpiled materials to reduce windblown dust.
  - Enforcing strict speed limits on gravel roads to minimize dust during material transport.
  - Dust fallout will be regularly monitored to ensure levels remain within permissible standards.
  - Monitoring stations will be installed to assess dust levels, particularly near sensitive areas such as water sources, grazing grounds, and accommodation facilities.
  - Adaptive management strategies will be employed to respond promptly to any dust-related concerns that arise during high wind periods.
- By maintaining dust at minimal levels, the health of wildlife and the quality of meat produced will not be compromised.
- Dust management measures, including regular site inspections and enhanced dust suppression during high wind periods, will reduce the risk of dust affecting nearby accommodations.
- While we note the concerns raised regarding dust, the combination of robust dust suppression measures, regular monitoring, and the temporary nature of the project will ensure that dust impacts are effectively managed and do not result in long-term effects.

## **THE ROAD**

- The DBAR for both the mining project and stockpile area indicates that the existing farm road will be used for site access. The EMPR outlines that the applicant will repair any damage caused to the access road as a direct result of the proposed activities and will implement measures to maintain the integrity of the road to the best of the applicant's ability.

- However, the increased traffic associated with the proposed project will likely accelerate the erosion of the road, leading to more frequent maintenance requirements. This continuous need for road repairs will create obstacles and potential traffic disruptions, ultimately affecting the experience and accessibility for customers visiting the property.
  - As mentioned above we acknowledge concerns about increased traffic and road wear. The applicant is committed to:
  - Implement measures to minimize disruption.
  - Repairing and maintaining roads affected by project-related activities to ensure continued accessibility for all users.
  - The visual impact of machinery will be mitigated through proper scheduling and limiting transport during peak tourist hours.

## **CONCLUSION**

- In light of the concerns outlined above, it is clear that the proposed mining and stockpiling project will have detrimental effects on our client's business operations and the environment. The potential impacts on the aesthetic value of the property, noise pollution, dust nuisance, and the condition of the access road could significantly diminish the appeal of our client's hunting farm thus directly affecting our client's profitability and sustainability. Furthermore, the health and welfare of the farm's wildlife, which are integral to the client's business model, could be compromised by the adverse effects of mining activities.
- Given the numerous risks posed by this proposed project, our client is compelled to formally object to the granting of the mining permit. The potential for long-term damage to the property's natural beauty cannot be overlooked.
- Section 10(2) of the Mineral and Petroleum Resources Development Act 28 of 2002 ("MPRDA") states that: "If a person objects to the granting of a prospecting right, mining right, or mining permit, the Regional Manager must refer the objection to the Regional Mining Development and Environmental Committee to consider the objections and to advise the minister thereof."
- The consequences of granting the mining permit are too significant to be disregarded, and we trust that this objection will be carefully evaluated during the decision-making process.
  - The proposed project is temporary, small-scale, and designed with strict mitigation measures to minimize environmental and social impacts.

- The aggregates produced will support necessary infrastructure improvements, benefiting the local community, tourism, and economic development.
- We confirm that your response will be included to the final BAR and EMPr for decision making to DMRE for them to refer the objection to the Regional Mining Development and Environmental Committee, as per Section 10(2) of the MPRDA.

We appreciate engagement and welcome any additional feedback or queries. Please do not hesitate to contact us in the event of any uncertainties.

Kind Regards
