NOTICE OF MINING PERMIT APPLICATION

Notice in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Mulo Newcastle Wind Power (Pty) Ltd applied for:

- environmental authorisation in terms of the NEMA and EIA Regulations, and
- a mining permit in terms of Section 27 of the MPRDA to mine aggregate, gravel and stone from a portion of the farm Byron No 9448 in the Amajuba District of KwaZulu-Natal.

The Applicant holds environmental authorisations for wind energy facilities near Newcastle and identified the earmarked 4.9 ha mining area to supply the proposed wind energy projects with construction material. The proposed mining footprint will entail the development of a greenfield site, and the mining method will be made use of opencast methods. Blasting will be used to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. When necessary, the material will be washed at an on-site washing plant prior to use. The material will be stockpiled until transported to the relevant construction sites.

The proposed project triggers the following listed activities in terms of NEMA and the EIA Regulations 2014 (as amended) and therefore requires an EIA (basic assessment) process:

- EIA Regulations GNR 963 Listing Notice 1 of 2014 (as amended) Activity 21:**
 Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in the Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.

The Draft Basic Assessment Report with Environmental Management Programme, will be available for public comment from **28 February 2025**. Copies thereof can be obtained from Greenmined upon request or downloaded from <https://www.greenmined.com/submit-public-comment>. Interested and Affected Parties (I&AP) are invited to provide written comments. The closing date for submission of comments is **02 April 2025**. DRAFT BASIC ASSESSMENT REPORT NOTICE

To whom it concerns

Dear Sir/Madam

27 February 2025

RE: NOTICE OF THE DRAFT BASIC ASSESSMENT REPORT AND ENVIRONMENTAL MANAGEMENT PROGRAMME FOR A MINING PERMIT APPLICATION IN TERMS OF THE MINERALS AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT NO 28 OF 2002) (MPRDA), THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 (ACT 107 OF 1998) (NEMA), AND THE ENVIRONMENTAL IMPACT ASSESSMENT REGULATIONS, 2014 (AS AMENDED) (EIA REGULATIONS) SUBMITTED BY MULILO NEWCASTLE WIND POWER (PTY) LTD. REFERENCE NUMBER: KZN 30/5/1/3/2/11072 MP.

Notice is hereby given in terms of the Mineral and Petroleum Resources Development Act, 2002 (Act No 28 of 2002) (MPRDA), the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA), and the Environmental Impact Assessment Regulations 2014 (as amended), that Mulilo Newcastle Wind Power (Pty) Ltd ("Applicant") applied for:

- environmental authorisation in terms of the NEMA and EIA Regulations, and
- a mining permit in terms of Section 27 of the MPRDA to mine aggregate, gravel and stone from a portion of the farm Byron No 9448 in the Amajuba District of KwaZulu-Natal.

The Applicant holds environmental authorisations for wind energy facilities near Newcastle and identified the earmarked 4.9 ha mining area to supply the proposed wind energy projects with construction material. The proposed mining footprint will entail the development of a greenfield site, and the mining method will make use of opencast methods. Blasting will be used to loosen the hard rock; the material will then be loaded and hauled to the crushing plant where it will be screened to various sized stockpiles. When necessary, the material will be washed at an on-site washing plant prior to use. The material will be stockpiled until transported to the relevant construction sites.

The proposed project triggers the following listed activity in terms of NEMA and the EIA Regulations 2014 (as amended) and therefore requires an EIA (basic assessment) process:

- EIA Regulations GNR 983 Listing Notice 1 of 2014 (as amended) Activity 21
Any activity including the operation of that activity which requires a mining permit in terms of section 27 of the Mineral and Petroleum Resources Development Act, as well as any other applicable activity as continued in this Listing Notice or in Listing Notice 3 of 2014, required to exercise the mining permit.

The draft Basic Assessment Report (DBAR) with Environmental Management Programme (EMPR), is now available for public comment. Copies thereof can be obtained from Greenmined Environmental (Pty) Ltd upon request or downloaded from the company website at <https://www.greenmined.com/mining-permits/>.

MEETING MINUTES

11 April 2025 / 9.00 AM

1. The meeting was conducted on 11 April 2025 at Rocomamas in Newcastle between *Muhsin Osman (MO)* and *Bothas Pass Community (BPC)* representatives.

2. Attendees list

- M Osman (MO – Mulilo)
- M.S Nkosi (Bothas Pass Community Secretary)
- S.S Magudulela (Bothas Pass Community Chairperson)
- J. Hadebe (Bothas Pass Community Deputy chairperson)

3. Discussion

- MO indicated that this mining right is different to all current mining applications in the Newcastle area. The purpose of this mine is not for coal mining, but to provide gravel, stone, and aggregate for the construction of a wind energy facility. Mulilo is proposing to construct a wind energy facility on a number of farms which involves the use of wind turbines to generate electricity. This electricity will be fed back to the national grid and reduce load shedding.
- There are no wind farms in KZN at present and the Mulilo Newcastle Wind Power stands to be the first one in the province. Most operational wind farms to date are located in Western Cape, Eastern Cape, and Northern Cape. There is however no longer grid available to connect these projects to in those provinces and companies like Mulilo have had to move to the north eastern provinces, Eastern Free State, KwaZulu-Natal, and Mpumalanga to look at developing wind farms as there is grid available to connect these projects to in those provinces.
- Mulilo has 6 operational renewable energy projects, two wind farms and four solar farms. All of these operational farms are located in the Northern Cape

4. Issues raised

- Security: BPC - Mentioned that there will be risk to livestock as theft might increase as a result of more workers brought to the area. MO: This issue has been raised by the surrounding farmers as well and measures will be put in place to alleviate these concerns
- Impact on waster source and environment: BPC - Mentioned that their members obtain there water from the escarpment and concern was raised about what the impact could be from this development. MO: The issue has been raised by other farmers as well and measures will be put in place to alleviate these concerns.
- Job creation: BPC - Mentioned that jobs should be offered to those in Ward 1 first, who are directly impacted by the project, as opposed to those in other wards. MO: The standard procedure is to work through the local municipality and this process will commence shortly.
- Benefits to the community: BPC - What benefits to the community will these projects have. MO - A community needs assessment will be conducted to access the needs of the community prior to the commencement of construction. These benefits will be rolled out to the wider community.

5. Further requests:

1. To see an operational wind energy facility
 2. To meet with local communities who have benefitted from a wind energy facility
 3. To meet with the DFFE, DMRE, and Premier's office
6. It was agreed that the parties will continue to engage in the coming months and Mulilo will possible meet with the wider Bothas pass community members to discuss the project.
7. **The meeting was adjourned at 10h00.**
